LEGEND LP Tube

LEGEND LP Tube is the latest bonding buccal tube created by TOMY Inc. LEGEND LP Tubes feature a large entry with chamfered edges to facilitate wire insertion along with gingival and occlusal side notches for a secure grip during positioning. LEGEND LP Tubes also include the same successful characteristics found in TOMY's current buccal tubes such as a curved anatomical contour base design, a V indent in crown, colour marks for easy quadrant identification and a micro-etched, 80-gauge mesh contour base for superior bonding. Its low profile and lowered mesially positioned hook enhances patient comfort.

Quadrant ID Mark
Eliminates inversion

Micro-Etched, 80-Gauge Mesh Base
Ensures consistent bonding

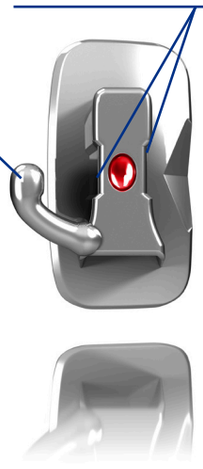

Anatomical Base
With a "V" indent in crown

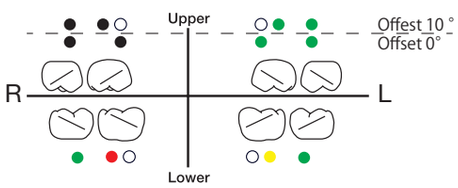

Chamfered Entry Edges
Facilitates wire insertion

Gripping Notches
Assist with accurate positioning

Laser Welded Hooks
Mesial position facilitates attachment of elastics
